## **BASIS FOR REJECTIONS**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

## **REJECTION OF CLAIMS ON FORMAL MATTERS**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 52-63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With reference to claim 52, the phrase "disposed one another" (line 5) is unclear and renders the subject matter indefinite.

## **REJECTION OF CLAIMS OVER PRIOR ART**

Claims 28-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Valeo Auto-Electric Wischer Und Motoren GMBH (WO 01/62408 A1, herein referred to as Valeo). Valeo illustrates in Figure 1 a method for bending strip material 15 by feeding the strip material between three support points 19 and 39 followed by a movable reverse bending roller 33 that reverse bends the strip material a lesser amount than the three supporting bending points 19 and 33. The operation of the bending is by a numerical control (see paragraph bridging pages 5 and 6). Not shown is also provided a cutting operation to cut the material to required lengths (see the second full paragraph on page 8). Valeo does not specify that the method be performed on

Art Unit: 3725

“steel”; rather, Valeo broadly performs the bending on “strip material”. It is the examiner’s position that the skilled artisan having the benefit of Valeo’s method would have been disposed to perform the method on any deformable material as dictated by the required use of the product. As to claims 31 and 32, clearly Valeo performs the bending using predetermined calculations so as to produce a product having the necessary configuration. The amount of reverse bend is clearly dependent upon the required sizing of the finished of the product. As to claim 34, see the paragraph bridging pages 5 and 6 and the first full paragraph of page 6 where trigger markings are used to denote the leading and trailing ends of each strip length.

Claims 40, 42-46, 50-52, 54-58, 62 and 63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reynolds Aluminum (NL 7807040, herein referred to as Reynolds) in view of Flemmer (5,685,186) or Valeo Auto-Eclectic Wischer Und Motoren GMBH (WO 01/62408). The Figure shows that a bender having three support points 2, 3 and 4 where the center support point 2 is adjustable and with a reverse bending roll 8 also being adjustable. Reynolds does not show that the reverse bending roll is numerically controlled and where a cutting implement is provided. This is shown by Flemmer or Valeo where computer controls can be provided to automatically control the positioning of the bending rolls and so as to eliminate any manual intervention in the bending of the strip material. Flemmer and Valeo also provide cutting units to sever the material to required lengths. It would have been obvious to the skilled artisan at the time of the invention to have modified Reynolds’ device by further providing the control concepts and cutting units of Flemmer or Valeo for the noted motivation. See the previous paragraph as the examiner’s position relates to claims 45 and 46

#### **INDICATION OF ALLOWABLE SUBJECT MATTER**

Claims 41 and 47-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 53, 59, 60 and 61 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### **PRIOR ART CITED BY EXAMINER**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

#### **RESPONSE BY APPLICANT(S)**

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).
